# YOUR COMPANION IN THE FIGHT AGAINST CORONAVIRUS

At Aidbots, we believe that robotics can play a crucial role in alleviating the issues faced by the medical community during this COVID crisis.

With 6 years of experience building robots, we developed Sahayak Robot to aid the medical personnel to deliver essentials to the patients in quarantine ward.

Sahayak robot will safeguard doctors and nurses by minimizing contact, save time by relieving them from the hassles of wearing PPE kits.

# A CONTACTLESS SOLUTION

## Features

### Easy to Use

Install the Sahayak app on your smartphone, scan the QR code and easily control the robot.

### Payload

Carry essential medicines and food packets, upto 15 kgs of payload.

### Long Battery

Upto 90 mins of long battery backup. Service multiple wards on single charge.

### Cost Effective Care

Stainless steel design, easy to clean the robot with regular clinical disinfectant.

### Customizable Design

Customise the robot according to your need, add extra shelves and batteries.

### Video Conferencing

10 inch tablet with audio-video capability, interact with the patients and access their condition without entering the ward.
